

Our Vision for HealthAlliance Hospital Brings Investment in the Health of Ulster County

As your community hospital and regional health network, we are investing in Kingston and Ulster County by enhancing facilities and improving access to medical treatment, technology and talented specialists.

HealthAlliance Hospital on Mary's Avenue on Track for 2022 Opening

This \$92 million hospital expansion and enhancement will offer a technologically advanced and welcoming environment. The new hospital will feature an emergency department with a behavioral health triage area; a Family Birth Center with private rooms for birthing mothers; advanced critical care capabilities; private rooms, and advanced imaging supported by Westchester Medical Center Health Network's partnership with Philips. Please visit www.hahv.org/new-healthalliance-hospital for more information and to request a tour.

New and Expanded Services, Closer to Home

A new HealthAlliance **Cardiac Catheterization Laboratory** significantly expanded the hospital's heart care services, and has already provided emergency or planned interventions to more than 350 people in the year since it opened. Soon to be relocated to the renovated Mary's Avenue campus, this 24/7 life-saving cardiology program is the first of its kind in Ulster County.

We recently announced the return of **inpatient psychiatry services** to Kingston which, when complete, will complement existing 24/7 emergency services and outpatient programs for behavioral health and substance abuse recovery. A **comprehensive behavioral health care infrastructure** for the Mid-Hudson region will be further enhanced by our announced Behavioral Health Center of Excellence at MidHudson Regional Hospital, which includes an expansion and renovation.

WMCHHealth has invested in additional medical services for the Ulster County community. This includes an expansion of our **Women's Health** program, which now offers minimally invasive surgical procedures and urogynecology. Additionally, **WMCHHealth Physicians in Kingston** now offers advanced cardiology, primary care medicine, pulmonology, endocrinology, gastroenterology, oncology, women's health and surgical care.

Local Economic Support

HealthAlliance Hospital continues to provide economic support to the region — generating an estimated \$292 million* in local revenue annually, creating well-paying construction jobs, and attracting families and well-trained health care professionals to the area.

Join Our Team as We Reimagine the Future of Health Care in Kingston

*Estimates for 2020. We estimate the economic impact of hospitals on communities using a calculation published by the Healthcare Association of New York State (HANYS). HANYS used the RIMS II multiplier devised by the U.S. Department of Commerce Bureau of Economic Analysis (BEA). The Direct Impact Multiplier for the Kingston Region is 1.6324.
